CAPE PACK

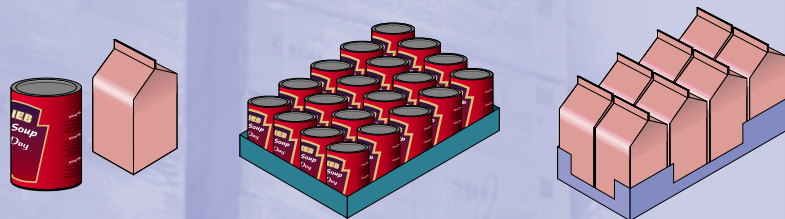

PALLETISING AND PACKAGING DESIGN SOFTWARE

Getting more product onto a pallet and improving storage and distribution efficiencies are the most effective ways of driving costs out of the Supply Chain.

Companies using our systems can increase their profits without having to sell more product, raise prices or increase market share.

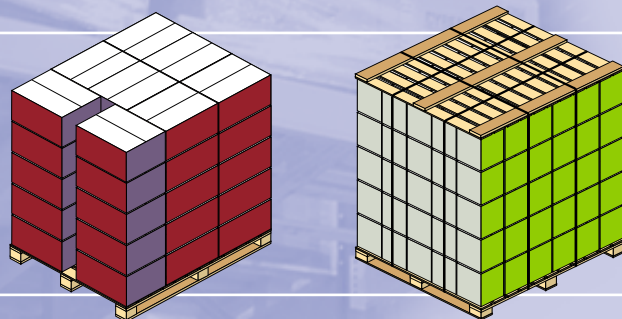

A new approach to your storage and distribution could help your business save money and make your life easier.

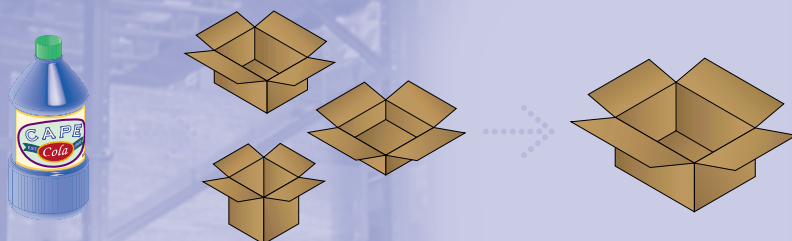

Products and Case Sizes

Find the best product size, case count, case size and pallet load. Pack in bundles or trays, shrink-wrap products, use realistic shapes and add surface graphics.

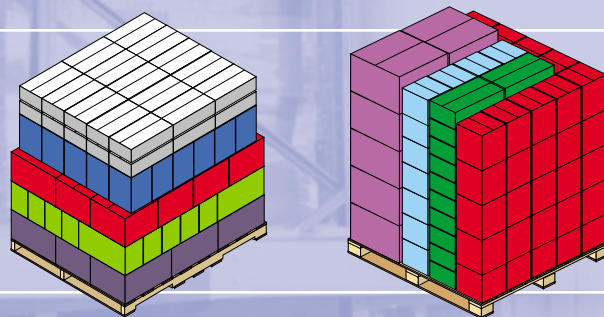

Pallet Patterns

Quickly see if you can get more cases onto a pallet. Interlock layers, show strapping, add top caps, corner posts, edit layers, show contents and put graphics onto cases.

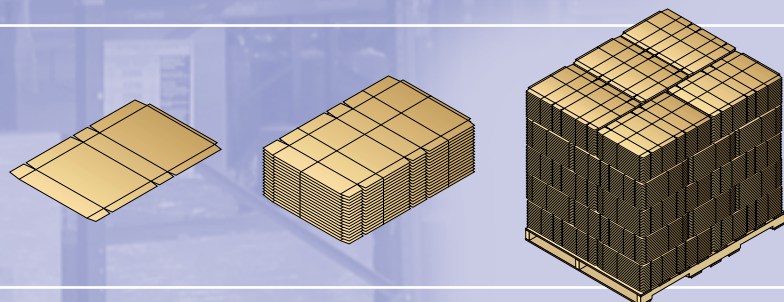

Less Case Sizes

Using the program's database enter existing case and tray sizes to find ways to pack existing products in less case sizes.

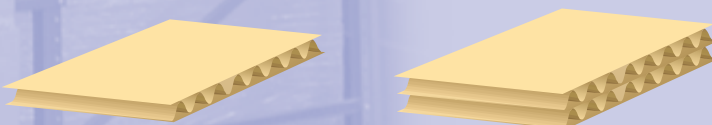

Display Pallets

Create pallet loads containing different products for in-store display purposes and consumer shopability.

Efficient Corrugated Flat Packs

Starting with a flat blank or a made up case, use your own formulas to create flat glued cases (KDF's). Find the best number per bundle, bundle size, number per pallet and per truck.

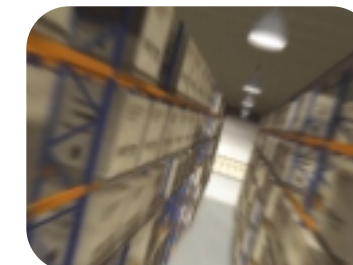

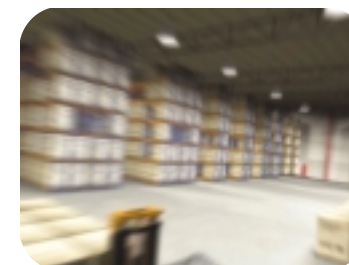

Case Strength Specifications

Calculate the compression strength of corrugated cases using standard or custom formulas.

Cape Systems is the global leader in palletising software, providing easy to use programs with excellent customer support.

With over 30 years of experience as the world's number one supplier our international customer base ranges from single program installations to world-wide site licenses and corporate accounts, including virtually every household name.

CAPE PACK PROGRAM FEATURES

- Add layer pads, top caps or corner posts to pallet loads
- Show strapping on pallets
- Edit pallet layers
- Create realistic product shapes and trays
- Add labels or logo's to products and cases
- Integrate with CAD, SAP, Excel, Word etc
- Variety of import/export options
- Foreign language versions available

BENEFITS OF USING CAPE PACK SOFTWARE

Easy to use:

easy data entry and program navigation, on-line Help and user documentation

Fast & Accurate:

defaults and settings so you can re-run solutions without re-entering data, calculate on 3 pallets at one time, right mouse clicks for formatting graphics

Integration:

save data, graphics or reports as a variety of formats and integrate with other programs (robots, SAP, CAD, Excel)

Instant access:

store solutions to database, publish reports as web pages via the internet and email packaging reports
